

OPERATOR'S EDGE

Quick Start

5 prompts to run your service business smarter.

Free from Handbuilt Digital

AI isn't just a content tool. It helps you quote faster, communicate better, build your brand, and catch the gaps in your business before they cost you. This Quick Start gives you 5 prompts to prove it — free, no strings, no fluff.

Fill in your brackets. Run it. See what happens.

PROMPT 1

The One-Prompt Framework

Most people write bad prompts because they're vague and give AI no real direction. This framework fixes that. Build it once, save it, use it every time.

ROLE	Tell AI who it is. "You are a social media writer for a local [type] business."
AUDIENCE	Tell AI who it's talking to. "My customers are local [describe your customers]."
GOAL	Tell AI exactly what you want. "Write a Facebook post promoting [your service]."
VOICE	Tell AI how you sound. "Friendly, direct, no corporate language. Never use [words you hate]."
CTA	Always include this. "End with a CTA to book at [YOUR BOOKING LINK] or call [YOUR PHONE]."
FORMAT	Tell AI what to give you. "Give me 3 versions — short, medium, and one with emojis."

"Always end your prompts with a CTA instruction. If you don't tell AI to include it, it won't."

PROMPT 2

Set Up Your Voice — Save It Once, Use It Forever

This is the most important prompt in any AI setup. Run it once in your AI tool, save it to memory, and every prompt you run after that already knows who you are.

YOUR VOICE SETUP PROMPT:

"I own [YOUR BUSINESS NAME], a [YOUR BUSINESS TYPE] in [CITY, STATE]. My customers are [DESCRIBE YOUR CUSTOMERS]. My brand voice is [3 ADJECTIVES — e.g., warm, direct, expert]. I never want to sound [WHAT TO AVOID — e.g., corporate, pushy, salesy]. I never use these words: [LIST ANY WORDS YOU HATE]. Every post and message should feel like it comes from a real person who cares about their customers. Always end with a CTA to [YOUR BOOKING LINK] or [YOUR PHONE NUMBER]. Save this and use it every time we work together."

“Train your AI like a new employee. The more context it has on day one, the less you re-explain every time.”

PROMPT 3

Introduce Your Business

The most useful social post you'll ever write. Use it on any platform. Update it seasonally. This is the one post that works for new followers, new customers, and new markets.

INTRODUCTION PROMPT:

"Write a post introducing [YOUR BUSINESS NAME] to new followers. We offer [YOUR SERVICES]. We are [family-owned / locally operated / veteran-owned / woman-owned — pick yours]. Tell people what makes us worth choosing — our process, our people, our guarantee. Warm and real, not salesy. End with a CTA to book at [YOUR BOOKING LINK] or call [YOUR PHONE NUMBER]."

PROMPT 4

Booking Confirmation — Write It Once, Use It Every Time

This is the message that runs in the background and makes you look professional every single day. Write it once, save it, and let it go. Your customers will notice even if they never say so.

BOOKING CONFIRMATION PROMPT:

"Write a booking confirmation message for a customer who just scheduled [SERVICE] at [YOUR BUSINESS NAME] on [DATE/TIME]. Include: what they booked, how long to expect, how to prepare, and how to reschedule if needed: [YOUR PHONE NUMBER]. Warm, professional, under 100 words."

"The businesses that communicate before, during, and after the job get the reviews. The ones that don't wonder why customers don't come back."

PROMPT 5

Respond to a 5-Star Review

Most businesses never respond to reviews. The ones that do build a public record of professionalism that converts every future customer reading it. This takes 2 minutes.

REVIEW RESPONSE PROMPT:

“Write a warm, genuine response to this 5-star Google review: [PASTE THE REVIEW]. Thank them by name if possible. Reference the specific service they mentioned. Invite them back. End with [YOUR BOOKING LINK] or [YOUR PHONE NUMBER]. Keep it under 75 words.”

Ready for the full system?

The Operator's Edge Starter Pack has 15 sections and 40+ prompts covering social content, quoting, hiring, competitor analysis, branding, and the full business operations layer. \$29.
